

Leading Partner in IV&V Services

Delivering solutions that enable large, complex IT projects to succeed—in California and across the United States.

Public Consulting Group (PCG) is a leading public sector solutions implementation and operations improvement firm that partners with government agencies at all levels – federal, state, local, and tribal – to improve lives. Founded in 1986 in Boston, Massachusetts, PCG currently employs over 2,500 professionals worldwide—all committed to delivering solutions that change lives for the better. Over the past 35 years, we have been honored to serve public sector organizations in all 50 states, six Canadian provinces, the United Kingdom, and Poland. Our Technology Consulting team is based in Sacramento, California, and offers a full spectrum of quality Information Technology (IT) services to help government agencies at every stage of the IT life cycle.

Focused on large, complex modernization and certification projects, our clients benefit from the collective knowledge and experience harnessed over nearly three decades of providing Independent Verification and Validation (IV&V) services across multiple domains, industries, technologies, and solution types. To ensure PCG clients always receive the most insightful services, our IV&V Center of Excellence collects, distills, and standardizes best practices, then trains and certifies each member of the Technology team.

Clients in all 50 states have called on PCG to help them address their most pressing challenges, including leveraging our IV&V expertise to help guide their projects to success. PCG’s value-based brand of IV&V is program, technology, and software lifecycle agnostic, and has proven successful across many domains including Health and Human Services, Finance, Labor and Workforce, Corrections and Rehabilitation, Transportation, Government Operations, Public Utilities, Education, and many others.

A Trusted IV&V Partner to California

Having delivered high quality, expert IV&V services to California since 1996, PCG has earned a reputation as a trusted partner to the state, even serving as a key contributor in the development of the state's IT Project Oversight Framework in 2003. Since then, PCG has continued to earn and enhance the reputation of being a premier service provider, one who helps projects succeed.

As a result, we have provided IV&V services on some of California's most important, and most complicated, IT projects in recent years, including:

- ✓ The Financial Information System for California (FI\$Cal)
- ✓ The California Statewide Automated Welfare System (CalSAWS) Migration
- ✓ The Employment Development Department's Unemployment Insurance Modernization (UIMOD)
- ✓ The Department of Public Health's (CDPH) electronic Women, Infants and Children Management Information System (eWIC)
- ✓ The Health and Human Services Agency's Child Welfare Services-Ca Automated Response and Engagement System (CWS-CARES)
- ✓ The Department of Social Services (CDSS) Case Management, Information and Payrolling System (CMIPS II)
- ✓ The Department of Health Care Services (DHCS) Medicaid Enterprise System Certification project
- ✓ And many others

Contact PCG today to learn more about how our experience and deep expertise in IV&V services can help your agency achieve its strategic goals.

Eclipse IV&V® Certified

Through the delivery of our standards-based, repeatable, high-value IV&V services that are constantly evolving to meet the ever-changing IT marketplace, PCG has earned a reputation as a best-in-class IV&V service provider. Over 100 PCG consultants have been trained and certified in Eclipse IV&V®, including more than 70 consultants operating out of the Sacramento office. We are proud to be a national leader in IV&V with a Sacramento focus.

Eclipse IV&V® on Digital Services

As State IT evolves, so does PCG. Our leading IV&V Service Delivery Framework - Eclipse IV&V® - has been successfully adapted to guide our clients to successful implementations of various technologies and the latest platforms, utilizing a wide range of delivery approaches. PCG's IV&V delivery expertise runs deep, and is proven in agile and continuous development approaches, has assessed and verified cloud readiness on various platforms, and has provided the insight needed for clients to know they are ready to migrate their legacy systems to modern solution stacks.

Mobile Reporting through PCG | insight

Recognizing and appreciating our clients' need for access to the most up-to-date information and metrics regarding project status and progress, we are proud to offer our clients a mobile reporting tool, PCG | insight, as a supplement to formal reporting. PCG | insight extends our 'no surprises' philosophy to our IV&V engagements, delivering near real-time project information to our clients. Other tools including a comprehensive checklist library, assessment guides, and enterprise findings log are built into PCG | insight to ensure our teams are providing the most valuable services as efficiently as possible.
